

First meeting of the fall season will be at 8:00 PM at the Pacific Science Center. Plans for a mushroom exhibit will be discussed, including naming of a chairman. This will be a tremendous task. Tentative date is October 18. There will be a slide showing, first without naming the species, then they will be reshown. Bring pencil and paper and see how good your eye is. There will also be a short identification session.

Our secretary has resigned, having accepted a position in Montana. Kay Ladue is serving as secretary in her place. Kleyn has moved to St. Louis, his place on the board has been filled by Robin Drake.

Photographs and slides are wanted. John Vitti should be contacted, as he wishes to establish standards for these.

Collector's Items

Agaricus augustus has been common all summer. The fall species are already showing, Cantharellus cibarius and C. subalbidus, Lepiota naucina, Agaricus campestris, Russula xerampelina, Lyophyllum cf. aggregatum, Lepista nuda, and many others have been found, some in the mountains, others in the lowlands.

It has been decided that there will be ten meetings in the coming year omitting July and August. Tentative programs for the meetings are:

- Sept. - as given.
- Oct. - exhibit work
- Nov. - possibly Prof. Smith, if available. Otherwise, a taxonomy lecture.
- Dec. - slide quiz no. 2.
- Jan. - Prof. Varo Tyler.
- Feb. - movie session to be selected.
- Mar. - Annual meeting
- Apr. - Spring Fungi.
- May - Microscopic structure of Ascomycetes.
- June - open - possibly a picnic?

A revised membership list is enclosed. If your name and/or address are incorrect or missing, see me or John Vitti.
